

What is eProject eXpress?

eProject eXpress (ePX) is a NEW streamlined pathway for using the eProject Builder (ePB) system. ePX enables you to track and report Energy Savings Performance Contracting (ESPC) project and program results, putting the power of data in your hands. The system allows you to access ESPC project data via standard or custom reports, and to archive and access ESPC project documents virtually in a centralized location. This free, secure online system was developed to meet the data management and reporting needs of state and local governments and is maintained by Lawrence Berkeley National Laboratory (LBNL) on behalf of the U.S. Department of Energy.

Why Use ePX?

Detailed energy project data are vital for tracking ESPC project and program performance and reporting results to stakeholders. ePX maximizes the value of your project data by:

- **Standardizing** data formats across market sectors and contractors
- **Facilitating** state or institution tracking and reporting of an ESPC project or portfolio of projects
- **Generating** standardized and customized reports, helping demonstrate the value of performance contracting projects and programs and the effective use of taxpayer funds
- **Preserving** ESPC project implementation and results data and archiving project files in perpetuity, helping to reduce costs and staff time associated with tracking data and contract agreements
- **Providing** state-level rollup reports that present summary information for ESPC projects on the energy savings and jobs created
- **Providing** authorized staff with secure access for reviewing sensitive ESPC project data

Getting Started

- **Request an account:** customers, contractors, and other stakeholders may request access via <https://eprojectbuilder.lbl.gov/account-request>.
- **Attend an introductory ePX webinar:** the ePX team hosts monthly demonstration and training webinars. Register on the ePB/ePX [Help/Documentation](#) page or request an invitation by emailing epb-support@lbl.gov.
- **Initiate projects in ePX:** customers initiate ESPC projects; contractors (e.g., ESCOs) enter all project data through the streamlined one-page upload template.
- **Request free technical assistance or custom training** for your team: Email epb-support@lbl.gov.
